# WisdomTree Physical Crypto Mega Cap

WisdomTree Physical Crypto Mega Cap ETP (exchange-traded product) provides investors with a simple, secure and cost-efficient way to gain exposure to the five largest crypto names.

Investing in WisdomTree Physical Crypto Mega Cap, a basket representing the five largest crypto names via an ETP, allows investors to leverage the benefits of traditional financial infrastructure and institutional product structuring while avoiding the complexities of direct crypto asset ownership. The ETP eliminates the need to store private access keys, interact with blockchain systems, or manage the technical intricacies of the crypto ecosystem while providing security, transparency and liquidity.

## Reasons to invest in WisdomTree Physical Crypto Mega Cap:

### **Clean and focused strategy**

The WisdomTree Physical Crypto Mega Cap ETP offers a streamlined approach to digital assets by tracking the CoinDesk 5 Index. This index captures the five largest and most liquid cryptocurrencies, providing investors with a simple, rules-based access point to the core of the crypto market.

### **Exposure to market leaders**

By focusing on the five most established digital assets, the index reflects the dominant platforms and protocols that underpin much of today's crypto ecosystem, from smart contract infrastructure to decentralised applications. This makes the ETP a compelling way to gain exposure to the sector's primary growth engines, without overextending into smaller or less proven projects.

### **Enhance or anchor a digital asset allocation**

The WisdomTree Physical Crypto Mega Cap ETP can serve as a core building block within a diversified crypto portfolio or act as a standalone solution for investors seeking

broad, high-quality exposure. By concentrating on the largest and most widely adopted cryptocurrencies, the product offers a balance of growth potential and resilience within the fast-evolving digital asset landscape.

## The CoinDesk 5 in an ETP with WisdomTree

Investors look to the ETP structure to provide additional protection for their investments:

**SECURITY** – Safely storing digital assets is not only about protecting against hacks but also protecting against the inadvertent loss of private keys. Investing in digital assets through an ETP structure allows investors to transfer the expensive and time-consuming burden of managing private keys to the issuer and to benefit from institutional-grade safeguarding of assets in cold storage<sup>1</sup>.

**TRANSPARENCY** – Transparency is a core component of the ETP structure. A digital assets ETP offers a core measure of confidence for investors by enabling access to an audited website from the issuer, showing exactly how many coins are represented by the outstanding fund shares. This is already standard practice in physical gold ETP structures and provides a core measure of transparency for investors.

**ETP STANDARDISATION** – Product standardisation is an aspect of the ETP wrapper that benefits investors in digital assets. Trading, holding and accounting for investments in ETPs are well established and the provision of crypto exposure in this format allows such investments to fit within an investor's existing systems, processes and risk management. Additionally, providing crypto exposure in an ETP deliver benefits from standard market features that many investors rely on. Centralised clearing, an exchange listing on a regulated venue and standard settlement practices all lower the operational and counterparty risk of making investments.

**LIQUIDITY** – ETPs tend to bring a centralisation of liquidity to asset classes. This is especially impactful in the crypto space as the current ecosystem is quite fragmented, with trading happening across many venues with no common settlement infrastructure. An investor would need to separately establish connectivity to several venues in order to access their liquidity. Investment in an ETP essentially outsources this responsibility to specialist market makers, with trading infrastructure to manage many exchange connections.

<sup>1</sup> Cold storage refers to the offline storage of private keys.

## Why the WisdomTree Physical Crypto Mega Cap?

- + 100% physically backed: Exposure to the spot price of crypto assets through an institutional-grade, physically backed structure. The corresponding digital assets are securely stored in institutional-grade "cold storage."
- + Institutional-grade custody: Investors benefit from institutional-grade cryptocurrency custody solutions, via a multi-custodian model with regulated custodians.
- + Low cost and easy access: Our diversified and scalable business allows us to offer one of the lowest fee crypto basket ETP ranges in Europe without compromising on security and risk management. They are listed and easily available via major regulated European markets.
