WisdomTree Blockchain UCITS ETF

The WisdomTree Blockchain UCITS ETF provides investors with a pure-play strategy focused on companies primarily involved in blockchain and cryptocurrency activities and poised to benefit from the many blockchain-powered megatrends such as payments, decentralised finance (DeFi), Web 3.0 and beyond.

Blockchain technology is undoubtedly a revolution in the making. Wherever a transparent, immutable and digital record of information could be useful, blockchain has the potential to disrupt the status quo. The variety of applications and use cases for blockchain are becoming more apparent and can be seen across many industries. As such, the range of potential applications for the technology is far-reaching and the future looks bright for companies involved, even if we are at the early stages of proliferation.

While bitcoin is the first digital currency based on the use of blockchain technology, which aimed to be a revolutionary, decentralised currency and payments system, the ecosystem has evolved far and wide outside this sphere. Over the years, blockchain technology has extended to support smart contracts that have enabled a vast number of use-cases. In many ways, blockchain technology does not support only one megatrend but several, including:

Disrupting payments

Digitalisation of finance

Decentralised finance

Web 3.0

Metaverse

Internet of things

At WisdomTree, we believe that investors can participate in this revolution not only through direct investment in Digital Assets but also by investing in a pure-play blockchain companies focusing on key use-cases within the ecosystem (Engagers) and companies that provide the underlying infrastructure (Enablers).

WisdomTree Blockchain UCITS Index

The WisdomTree Blockchain UCITS Index is designed to measure the performance of a basket of stocks representing the investable universe of blockchain-focused companies. Companies must be domiciled and their equity must be listed within eligible developed and emerging market countries subject to certain liquidity requirements as defined in the [index rules](#).

Selection of Companies

At WisdomTree, we classify blockchain-focused companies as Enablers, that support the ecosystem, or Engagers, that are developing and providing blockchain-centric solutions. To classify stocks in these two categories, the index leverages WisdomTree's heritage of innovation and self-indexing as well as, WisdomTree's global digital assets team's knowledge of the blockchain ecosystem.

Blockchain Enablers: Companies that provide blockchain infrastructure or partake directly in cryptocurrency mining. These primarily include:

- + **Crypto miners and validators** that process blocks of transactions, mostly in Proof of Work¹ blockchains, to yield a minted block subsidy
- + **Blockchain infrastructure providers** include, but are not limited to, specialised hardware or high-performance computing infrastructure for the purpose of cryptocurrency mining, or secure cryptocurrency storage

Blockchain Engagers: Companies that provide blockchain and cryptocurrency products, services, or applications, or are integrating blockchain technology into their core operations or strategic investments. These primarily include:

- + Cryptocurrency trading platforms and exchanges
- + Providers of blockchain-based financial services
- + Blockchain-based payment systems
- + Other blockchain-based, digital ledger technology solutions or investments

Companies that are representative of the aforementioned activities and sectors are selected for inclusion in the index. Each company is assigned a Thematic Score reflecting the nature, purity, and strategic importance of its Blockchain and Cryptocurrency Activities. Scores are assigned

¹ Proof-of-work is a consensus mechanism that is used to verify blockchain transactions' validity, through solving of computationally intensive puzzles using miners' computers' processing power.

based on revenue exposure and strategic positioning, with higher scores indicating greater thematic alignment and growth potential tied to the theme.

Index Weighting and Rebalancing

The index is a Thematic Score-weighted index, subject to capping and liquidity adjustments. The weight of any single constituent is capped at 10% at each quarterly rebalancings (February, May, August and November).

The selected constituents are weighted by their Thematic Score, with adjustments to ensure sufficient liquidity. This weighting reflects WisdomTree's belief that firms with greater purity of revenue and deeper economic relevancy to the blockchain ecosystem are best positioned to capture its long-term growth potential.

The full methodology document, that includes all relevant index details, is available on the WisdomTree [website](#).

ESG Considerations

WisdomTree understands the importance of Environmental, Social and Governance (ESG) considerations within investment strategies, and incorporates (on top of the weighting limit for Enablers) general WisdomTree ESG screens based on the assessment from Sustainalytics, a leading independent ESG and corporate governance research, ratings and analytics firm.
