For professional Clients only

WisdomTree was founded in 2006 with a passion for creating better ways to index, innovate and invest for our clients, and by being the first investment manager to weight by dividends. We have always challenged the status quo and believe investors should too.

Since then, our European business has grown in terms of our product set and assets under management. How did we do this? A combination of our world class team, innovative ideas and products and smart acquisitions of various complementary businesses to help maintain our competitive advantages.

- + In 2014, we acquired a company called Boost ETP, the first European platform to offer 3x short and leveraged ETPs
- + In April 2018, we completed the acquisition of ETF Securities' exchange-traded commodities, currencies and short-and-leveraged ETP business, including Europe's first gold ETP
- + In September 2019, we unified 224 products under the WisdomTree brand and closed 192 duplicative or extraneous products across our product set

Today, we provide one of the most innovative ranges of UCITS Exchange Traded Funds (ETFs) and Exchange Traded Products (ETPs) covering commodities, FX, equities, fixed income, digital assets as well as short & leveraged exposures.

An investment in exchange-traded products (“ETPs”) is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs involve numerous risks including among others, general market risks relating to the relevant underlying index, credit risks on the provider of index swaps utilised in the ETP, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks.

Risk Warnings

Securities issued by the Issuers may be structured products involving a significant degree of risk and may not be suitable for all types of investor. Any decision to invest should be based on the information contained in the prospectus (and any supplements thereto) of the relevant Issuer which includes, inter alia, information on certain risks associated with an investment. The price of any securities may go up or down and an investor may not get back the amount invested. Securities may be priced in US Dollars, Euros, or Sterling, and the value of the investment in other currencies will be affected by exchange rate movements.

Short and leveraged exchange-traded products are only intended for investors who understand the risks involved in investing in a product with short and/or leveraged exposure and who intend to invest on a short-term basis. Any investment in short and/or leveraged products should be monitored on a daily basis to ensure consistency with your investment strategy. You should understand that investments in short and/or leveraged exchange-traded products held for a period of longer than one day may not provide returns equivalent to the return from the relevant unleveraged investment multiplied by the relevant leverage factor. Potential losses in short and/or leveraged exchange-traded products may be magnified in comparison to investments that do not incorporate these strategies. You should consult an independent investment adviser prior to making an investment in short and/or leveraged exchange-traded products in order to determine its suitability to your circumstances.

Investors should refer to the section entitled “Risk Factors” in the relevant prospectus for further details of these and other risks associated with an investment in the securities offered by the Issuers before investing. The relevant prospectus for each Issuer may be obtained from www.wisdomtree.com. Please contact WisdomTree at +44 20 7448 4330 or infoEU@wisdomtree.com for more information.
