

This Supplement forms part of and should be read in conjunction with the general description of the Company contained in the current Prospectus dated 12 October 2016 together with the most recent annual report and audited financial statements and if published after such report, a copy of the latest half-yearly report and unaudited financial statements. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant or other independent financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration" in the Prospectus accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in the Prospectus and this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

WISDOMTREE JAPAN EQUITY UCITS ETF

(an open-ended sub-fund of WisdomTree Issuer plc, an umbrella investment company with variable capital and having segregated liability between its Funds incorporated with limited liability in Ireland under registration number 503861 and authorised and regulated by the Central Bank of Ireland as a UCITS)

SUPPLEMENT

This Supplement contains information relating to the WisdomTree Japan Equity UCITS ETF. To the extent there is any inconsistency between this Supplement and the Prospectus, this Supplement shall prevail. Capitalised terms used and not defined herein shall have the meaning attributed to them in the Prospectus. Notwithstanding the provisions of Section 5.4 of the Prospectus, the WisdomTree Japan Equity UCITS ETF may enter into FDI transactions.

Shares of certain Share classes of the WisdomTree Japan Equity UCITS ETF have been admitted to the Official List and to trading on the Main Securities Market of the Irish Stock Exchange. Application will be made to the Irish Stock Exchange for Shares of all other Share classes of the WisdomTree Japan Equity UCITS ETF issued and available for issue to be admitted to the Official List and to trading on the Main Securities Market of the Irish Stock Exchange.

Shares of certain Share classes of the WisdomTree Japan Equity UCITS ETF have also been admitted to trading on the Main Market of the London Stock Exchange. Application will be made to the London Stock Exchange for the Shares of all other Share classes of the WisdomTree Japan Equity UCITS ETF issued and available for issue to be admitted to trading on the Main Market of the London Stock Exchange.

The date of this Supplement No. 10 is 12 October 2016.

WISDOMTREE JAPAN EQUITY UCITS ETF

Fund: WisdomTree Japan Equity UCITS ETF
Index: WisdomTree Japan Dividend Index

1.1 Investment Objective

The WisdomTree Japan Equity UCITS ETF (the “**Fund**”) seeks to track the price and yield performance, before fees and expenses, of an index that measures the performance of Japanese equity markets.

1.2 Investment Policy

In order to achieve this objective, the Fund will employ a “passive management” (or indexing) investment approach and will invest in a portfolio of equity securities that so far as possible and practicable consists of a representative sample of the component securities of the WisdomTree Japan Dividend Index (the “**Index**”).

The use of a representative sampling strategy means that, while the Fund will seek to invest all, or substantially all, of its assets in securities that are constituents of the Index, it may invest in a sample of Index constituents whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole. The Fund may also hold some securities which are not underlying constituents of the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole.

Where consistent with its investment policy, the Fund may from time to time invest in equity or equity-related securities listed or traded on a Regulated Market (such as large, medium or small cap equities, common or preferred stocks and Depositary Receipts), other transferable securities (for example, medium term notes) and open-ended collective investment undertakings. Subject to the provisions of the Regulations and the conditions imposed by the Central Bank, the Fund may invest in other funds of the Company.

The Fund may enter into repurchase/reverse repurchase agreements and stock lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the Prospectus.

The Fund may hold ancillary liquid assets from time to time, for example, as dividends are collected. In such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes, transferable securities (for example, medium term notes) and money market instruments (such as short dated government backed securities, floating rate notes, commercial paper, certificates of deposit, treasury bills and treasury notes, each of which, where relevant, will be of investment grade at the time of acquisition).

Therefore, while the Fund may from time to time invest in all constituents of the Index, it is not expected that at all times it will hold every constituent (or a similar weighting of any such constituent) of the Index.

1.3 Share classes

The Fund currently has different classes of Shares as set out in Section 4. Share classes may be designated in the Base Currency or in currencies other than the Base Currency (the “**Share Class Currency**”). Furthermore, the Fund may also offer either statically hedged share classes or dynamically hedged share classes (collectively “**Hedged Share Classes**”) which will mitigate or hedge the exposure of Japanese Yen (the “**Portfolio Currency**”) to a currency designated at the Hedged Share Class level (the “**Exposure Currency**”). Although the Exposure Currency and Share Class Currency of each of the existing Share classes of the Fund are the same, the Exposure Currency of any new Share class established in the future may differ from its Share Class Currency. The Share Class Currency for each Share class and Exposure Currency as well as the hedged index of each Hedged Share Class are disclosed below under the heading “Available Share Classes”.

Statically Hedged Share Classes

Statically hedged share classes will mitigate or hedge the exposure of the Portfolio Currency to the relevant Exposure Currency through the use of forward exchange contracts that so far as possible and practicable track the static currency hedging methodology of a currency hedged version of the Index which seeks to provide a static currency hedged return (the “**Statically Hedged Share Classes**”) (the relevant “**Statically Hedged Index**”).

The currency hedging methodology of Statically Hedged Share Classes will so far as practicable replicate the currency hedging methodology of the applicable Statically Hedged Index. Therefore there is no discretion to alter or vary the hedging methodology used by Statically Hedged Share Classes. The currency hedging methodology consists of entering into a forward exchange contract (a contract between two parties to buy or sell a specific currency in the future at an agreed upon exchange rate) in order to hedge the Portfolio Currency to the relevant Exposure Currency.

In accordance with the hedging methodology of the applicable Statically Hedged Index, the Statically Hedged Share Class’ foreign currency exposure is re-set at the end of each month using one-month forward exchange contracts (a “**Static Hedge Position**”). The Static Hedge Position is proportionately adjusted for net subscription and redemptions during the month. However, no adjustments will be made to the Static Hedge Position during the month to account for price movements of the Fund’s Investments, corporate events affecting such Investments, or additions, deletions or any other changes to the Index constituents (and thereby to the Fund’s portfolio of Investments). The Static Hedge Position may be adjusted during the month in order to avoid breaching the counterparty exposure limit.

Intra month, the notional amount of the Static Hedge Position may not exactly offset the foreign currency exposure of a Statically Hedged Share Class. Depending on whether the Statically Hedged Index has appreciated or depreciated between each monthly Hedge Position re-set, a Statically Hedged Share Class’ Portfolio Currency exposure may be under-hedged or over-hedged respectively.

Any gains resulting from a Static Hedge Position shall be reinvested at the end of the month when the Static Hedge Position is being re-set. In the event that the Static Hedge Position provides exposure to the relevant Exposure Currency which is greater than the corresponding exposure to the Portfolio Currency prior to the month-end reset, the Statically Hedged Share Classes will have an exposure to the Exposure Currency in excess of the value of the corresponding Portfolio Currency-denominated investments. Conversely, in the event that the Static Hedge Position provides exposure to the relevant Exposure Currency which is less than the corresponding exposure to the Portfolio Currency prior to the month-end re-set, the Statically Hedged Share Classes will have an exposure to the relevant Exposure Currency which is less than the value of its corresponding Portfolio Currency-denominated Investments. Any exposure difference will be re-set at month end when the Static Hedge Position is re-set. All transactions will be clearly attributable to the specific Statically Hedged Share Class and currency exposures of different classes will not be combined or offset.

Dynamically Hedged Share Class

Dynamically hedged share classes will mitigate or hedge the currency fluctuations in the relative value of the Portfolio Currency against the relevant Exposure Currency that so far as possible and practicable track the dynamic currency hedging methodology of an index which seeks to provide a dynamic currency hedged return (the “**Dynamically Hedged Share Classes**”) (the relevant “**Dynamically Hedged Index**”). This is achieved through the use of forward exchange contracts that so far as possible and practicable tracks the index methodology of the Dynamically Hedged Index. The Dynamically Hedged Index sets a level of hedging ranging from a hedge ratio of 0% to 100% and dynamically determines and adjusts the hedge ratio on the Portfolio Currency on a monthly basis using three equally weighted quantitative signals: (i) interest rate signal (ii) momentum signal and (iii) value signal. Therefore, there is no discretion to alter or vary the hedging methodology used by the Dynamically Hedged Share Classes. Each signal contributes one third (33.33%) to the over all hedge ratio:

1. Interest Rate Signal

Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange contracts, between the Portfolio Currency and the Exposure Currency. If the implied interest rate of the Exposure Currency is higher than that within the Portfolio Currency, a 33.33% hedge ratio is applied.

2. Momentum Signal

Momentum is the relative price momentum of the Portfolio Currency as determined by comparing two moving average signals on the historically observed Exposure Currency spot price over 10 and 240 business day periods. When the ten day moving average of the Portfolio Currency's spot price versus the Exposure Currency is weaker than the 240 day moving average (i.e. the Portfolio Currency is depreciating), a hedge ratio of 33.33% is applied.

3. Value Signal

Value is the relative purchasing power of the Portfolio Currency as determined with reference to the Portfolio Currency spot price over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). The final 33.33% of the total hedge ratio is determined by a value signal that utilises the concept of PPP in order to define a measure of relative value for the Portfolio Currency against the Exposure Currency. Depending on the level of the value score a hedge of 0%, 16.67% (representing 50% of the value factor) or 33.33% may be applied to the relevant Dynamically Hedged Share Class.

On a monthly basis the hedge ratio of the Portfolio Currency can be adjusted to either 0.00%, 16.67%, 33.33%, 50%, 67.67%, 83.33% or 100% (the "**Dynamic Hedge Position**")

Given the varying Dynamic Hedge Positions that may be applied, a Dynamically Hedged Share Class' Portfolio Currency exposure may be under-hedged or over-hedged. In the event that the Dynamic Hedge Position is set below 100%, the Dynamically Hedged Share Classes will have an exposure to the relevant Exposure Currency which is less than the value of its corresponding Portfolio Currency-denominated Investments. In the event that the Dynamic Hedge Position is set at 100%, the Dynamically Hedged Share Classes may, in limited circumstances, have an exposure to the Exposure Currency in excess of the value of the corresponding Portfolio Currency-denominated investments. All transactions will be clearly attributable to the specific Dynamically Hedged Share Class and currency exposures of different classes will not be combined or offset.

Currency Manager

State Street Europe Limited has been appointed by the Manager and the Investment Manager on a non-discretionary basis to facilitate the carrying out of forward exchange transactions, within parameters determined and defined by the Manager and the Investment Manager for the purpose of implementing the currency hedging strategies described above. State Street Europe Limited (the "**Currency Manager**") is a leading financial services provider, regulated in the United Kingdom by the Financial Conduct Authority (FCA) that has \$200 billion in assets under management and employs approximately 30 professionals in its currency management team as of July 2015. The costs and liabilities (including the cost which may be charged by the Currency Manager on a monthly basis as a spread to the relevant hedging transactions) and / or benefits arising from the instruments entered into for the purposes of implementing currency hedging for the benefit of any Hedged Share Class shall be attributable exclusively to that class.

1.4 Leverage and Global Exposure

The Fund's global exposure will be calculated using the commitment approach. It is not the Investment Manager's intention to leverage the Fund, however, the Fund may be leveraged from time to time due to the use of forward exchange contracts as part of the currency hedging methodology followed by the Hedged Indices. The Fund may therefore not be leveraged more than 100% of its Net Asset Value. That is, the total exposure associated with the Investments of the Fund, including investments in FDI, may amount to 200% of the Net Asset Value of the Fund.

2. WISDOMTREE JAPAN DIVIDEND INDEX

2.1 Index Description

The Index is designed to provide exposure to Japanese equity markets.

The Index consists of dividend-paying companies that are incorporated in Japan, are traded on the Tokyo Stock Exchange and which derive less than 80% of their revenue from sources in Japan. By excluding companies that derive 80% or more of their revenue from Japan, the Index is tilted towards companies with a more significant global revenue base. The companies included in the Index typically have greater exposure to the value of global currencies.

Eligibility requirements include: (i) payment of at least \$5 million in cash dividends on common shares in the annual cycle prior to the annual Index screening date; (ii) market capitalisation of at least \$100 million as of the Index screening date; (iii) average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; (iv) a calculated volume factor (the average daily dollar volume for three months preceding the Index screening date divided by the weight of the security in the Index) that is greater than \$200 million; and (v) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay more total dollar amount of dividends are more heavily weighted. At the time of the Index's annual screening date, the maximum weight of any single security in the Index is capped at 5% and the maximum weight of any one sector in the Index is capped at 25%, subject to the following volume factor. In the event that a company has a calculated volume factor that is less than \$400 million as of the annual Index screening date, (i) the company's weight in the Index will be reduced such that its weight equals its weight prior to the adjustment multiplied by a fraction of its calculated volume factor divided by \$400 million, and (ii) the reduction in the company's Index weight may cause a sector's weight to rise above 25%. In response to market conditions, security and sector weights may fluctuate above the specified cap between annual Index screening dates.

The Index is "reconstituted" on an annual basis. During the annual reconstitution, securities are screened to determine whether they comply with WisdomTree Investment, Inc.'s ("**WisdomTree**") proprietary Index methodology and are eligible to be included in the Index on the basis of the requirements outlined above. New securities are added to the Index only during the "annual reconstitution." Details of the annual reconstitution are available on www.wisdomtree.eu.

WisdomTree, as Index Provider, currently uses Standard & Poor's Global Industry Classification Standards ("**S&P GICS**") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, and oil and petroleum industries. At the time of the last screening, a significant portion of the Index is comprised of companies in the consumer discretionary and industrial sectors.

2.2 Hedged Index Methodologies

The hedging methodologies of the Statically Hedged Index and the Dynamically Hedged Index (collectively the "**Hedged Indices**") seek to minimise the impact of currency fluctuations in the relative value of the Portfolio Currency against the Exposure Currency through the use of forward exchange contracts.

An investment in a Share class that tracks the return of a Hedged Index is designed to have higher returns than an equivalent investment in a corresponding unhedged Share class when the Portfolio Currencies of the Fund are weakening relative to the Exposure Currency of the relevant Hedged Share Class. Conversely, an investment in a Share class that tracks the return of a Hedged Index is designed to have lower returns than an equivalent investment in a corresponding unhedged Share class when the Portfolio Currencies of the Fund are rising relative to the Exposure Currency of the relevant Hedged Share Class. Further details in relation to the Index and the Hedged Indices (collectively the "Indices") are available on www.wisdomtree.eu.

2.3 Index Calculation Agent

In order to minimise any potential for conflicts caused by the fact that WisdomTree and its affiliates act as Index Provider and Promoter of the Company, WisdomTree has retained an unaffiliated third party to calculate the Indices (the “**Calculation Agent**”). The Calculation Agent, using the applicable rules-based methodology, will calculate, maintain and disseminate the Indices on a daily basis. WisdomTree will monitor the results produced by the Calculation Agent to help ensure that the Indices are being calculated in accordance with the applicable rules-based methodology. In addition, WisdomTree has established policies and procedures designed to prevent non-public information about pending changes to the Indices from being used or disseminated in an improper manner.

2.4 Risk Management Process

In accordance with the requirements of the Central Bank, the Investment Manager and where applicable the Currency Manager, employs a risk management process to enable it to accurately calculate, monitor, measure and manage, the various risks associated with the use of FDI by the Fund. The Investment Manager, and where applicable the Currency Manager, uses the “Commitment Approach” to measure the Fund’s incremental exposure and leverage generated through the use of FDI. The Commitment Approach seeks to manage and measure the global exposure and potential loss due to the use of FDI by the Fund. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the assets being hedged.

2.5 Portfolio Transparency

Information about the Investments of the Fund is made available on a daily basis. The Fund may disclose on www.wisdomtree.eu at the start of each Business Day the identities and quantities of the securities and other assets held by it. The portfolio holdings so disclosed will be based on information as of the close of business on the prior Business Day and/or trades that have been completed prior to the opening of business on that Business Day and that are expected to settle on that Business Day.

2.6 Anticipated Tracking Error

The Investment Manager aims to keep Tracking Error between 0.20% and 2% for each Share class under normal market conditions. In addition, the Currency Manager aims to keep Tracking Error arising from currency hedging methodologies pursued in respect of the Hedged Share Classes to a minimum (such that the Tracking Error resulting from a combination of the hedging activities of the Currency Manager and the activities of the Investment Manager falls within the range anticipated above). There is, however, no guarantee that this level of Tracking Error will be realised and none of the Company, the Manager, the Investment Manager or, where relevant, the Currency Manager will be liable for any discrepancies between the Share class’ anticipated level of Tracking Error and the actual level of Tracking Error (as subsequently observed). The annual report of the Company will provide an explanation of any divergence between anticipated and realised Tracking Error for the relevant period. The annual and half-yearly reports will state the Share class’ Tracking Error at the end of the period under review.

3. RISK FACTORS

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. Investors should consider the risk factors set out in the Prospectus together with the following risks:

Equity Risk. The market prices of equity securities owned by the Fund may go up or down, sometimes rapidly or unpredictably. The value of a security may decline for a number of reasons that may directly relate to the issuer (investors should also refer to "Issuer-Specific Risk" below). The values of equity securities also may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. The Fund may continue to accept new subscriptions and to make additional investments in equity securities even under general market conditions that the Investment Manager views as unfavourable for equity securities.

Equity securities generally fall into four broad categories – large-cap, mid-cap, small-cap and micro-cap. If the Fund invests primarily in one category, there is a risk that due to current market conditions, the Fund may perform less well than a fund that is invested in another category or across several categories.

FDI Risk. Forward exchange contracts entered into in respect of a Hedged Share Class may be executed either on an exchange or OTC. Forward exchange contracts tend to have a greater volatility than the securities to which they relate and they bear a corresponding greater degree of risk. The primary risks associated with the use of such FDI are (i) failure to predict accurately the direction of the market movements and (ii) market risks, for example, lack of liquidity or lack of correlation between the change in the value of the underlying asset and that of the value of a Fund's FDI positions. These techniques may not always be possible or effective in enhancing returns or mitigating risk. The Fund's investment in OTC derivatives is subject to the risk of counterparty default. In addition, a Fund may have to transact with counterparties on standard terms which it may not be able to negotiate and may bear the risk of loss because a counterparty does not have the legal capacity to enter into a transaction, or if the transaction becomes unenforceable due to relevant legislation and regulation. To the extent that the Fund invests in forward exchange contracts, the Fund may take a credit risk with regard to parties with whom it trades and may also bear the risk of settlement default.

Hedging Methodology Risk. While the hedging methodology used by the Hedged Indices and tracked by the Hedged Share Classes is designed to minimise the impact of currency fluctuations on Hedged Share class returns, it does not necessarily eliminate the Hedged Share class' exposure to the Portfolio Currency. The return of the forward currency contracts may not perfectly offset the actual fluctuations between the Portfolio Currency and the Exposure Currency.

Depending on the Dynamic Hedge Position for a particular month, the hedging methodology of a Dynamically Hedged Index may not aim to fully eliminate a Dynamically Hedged Share Class' exposure to the Portfolio Currency.

Investment Risk. There is no assurance that any appreciation in the value of Investments will occur, or that the investment objective of the Fund will be achieved.

Market Risk. The trading price of equity securities, fixed income securities, commodities and other instruments fluctuates in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Net Asset Value of a Shares Class, like security and commodity prices generally, will fluctuate within a wide range in response to these and other factors. Possible continuing market turbulence may have an adverse effect on the Share performance. As a result, an investor could lose the value of its investment over short or even long periods.

Counterparty Risk. The Fund is subject to credit risk with respect to the counterparties with which the Company, on behalf of the Fund, enters into FDI and other transactions such as repurchase agreements and securities lending transactions. If a counterparty becomes insolvent or otherwise fails to perform its obligations, a Fund may experience significant delays in obtaining any recovery in an insolvency, bankruptcy, or other re-organisation proceeding and may obtain only a limited recovery or may obtain no recovery.

Country Risk. The value of the Fund's assets may be subject to uncertainties such as changes in Japan's government policies, taxation, restrictions on foreign investment, currency decisions, applicable laws and regulations, or any natural disasters or political upheaval, which may weaken a country's securities markets.

Currency Risk. Where the Index constituents are denominated in currencies other than the Base Currency or the Share Class Currency, Investments of the Fund will be acquired in currencies which are not in the Fund's Base Currency or the Share Class Currency. The Fund will therefore be subject to exchange rate risk and the cost of acquiring Investments may be adversely or favourably affected by fluctuations in the exchange rate of the different currencies.

If an investor's currency of reference is different from the Fund's Base Currency or the Share Class Currency, adverse movements in exchange rates between those currencies can result in a decrease in return and a loss of capital for such investor.

Hedging techniques in the form of currency forwards will be used to mitigate the exposure of a Share Class Currency to the Portfolio Currency.

Geographic Investment Risk. As the Fund invests a significant portion of its assets in the securities of companies in Japan, it is likely to be impacted by events or conditions affecting that country or region. For example, political and economic conditions and changes in regulatory, tax, or economic policy in Japan could significantly affect the market in that country and in surrounding or related countries and may have a negative impact on the Fund's performance.

Issuer-Specific Risk. Changes in the financial condition of an issuer or counterparty, changes in the specific economic or political conditions that affect a particular type of security or issuer, and changes in the general economic or political conditions can affect a security's or instrument's value. Issuer-specific events can have a negative impact on the value of a Fund.

Concentration Risk. A Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds. In addition, a Fund may concentrate its Investments in companies in a particular industry, market or economic sector. When a Fund concentrates its Investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector. Further, investors may buy or sell substantial amounts of a Fund's shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its Investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and thereby, its performance.

Sectorial Investment Risk. To the extent the Fund invests a significant portion of its assets in the securities of companies of a particular sector, it is more likely to be impacted by events or conditions affecting that sector. The Fund may invest a relatively large percentage of its assets in sectors, including the consumer discretionary sector, the industrial sector, the information technology sector and the financial sector, which sectors have tended to form a relatively large percentage of the Index. Further details of the specific risk relevant to these sectors are set out below.

- **Consumer Discretionary Sector Risk.** This sector consists of, for example, automobile, media and retail companies. The consumer discretionary sector of the economy can be significantly affected by, among other things, economic growth, worldwide demand and consumers' disposable income levels and propensity to spend.
- **Industrial Sector Risk.** This sector can be significantly affected by, among other things, worldwide economic growth, supply and demand for specific products and services, rapid technological developments, international political and economic developments, environmental issues, and tax and governmental regulatory policies.
- **Information Technology Sector Risk.** This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development and government regulation. Challenges facing companies in the information technology sector include distressed cash flows due to the need to commit substantial capital to meet increasing competition, particularly in formulating new products and services using new technology, technological innovations that make existing products and services obsolete, and satisfying consumer demand.
- **Financial Sector Risk.** This sector can be significantly affected by changes in interest rates, government regulation, the rate of corporate and consumer debt defaulted, price, competition, and the availability and cost of capital.

Shares of a Fund May Trade at Prices Other than Net Asset Value. As with all exchange-traded funds, Shares may be bought and sold in the secondary market at market prices. Although it is

expected that the market price of the Shares will approximate the Net Asset Value of a Share class, there may be times when the market price and the Net Asset Value vary significantly, including due to supply and demand of the relevant Shares and/or during periods of market volatility. Thus, you may pay more (or less) than Net Asset Value intra-day when you buy Shares in the secondary market, and you may receive more (or less) than Net Asset Value when you sell those Shares in the secondary market. If an investor purchases Shares at a time when the market price is at a premium to the Net Asset Value of the relevant Share class or sells at a time when the market price is at a discount to the Net Asset Value of the relevant Shares, an investor may sustain losses.

Mid- and large-capitalisation investing. The Fund may invest a relatively large percentage of its assets in the securities of mid- and large-capitalisation companies. The securities of mid-capitalisation companies may be subject to more unpredictable price changes than securities of larger companies or the market as a whole. The securities of large-capitalisation companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion.

4. SHARE DEALING

4.1 General

Orders for Creation Units may be settled in cash, in-kind (or in a combination of both, at the Manager’s discretion). Investors are referred to the procedures for subscribing and redeeming Creation Units in the section entitled “Share Dealing” of the Prospectus. Share classes of the Fund available as at the date of this Supplement are detailed below under the heading “Available Share classes”.

4.2 Dealing

Issue of Shares	The Directors have resolved that Shares in the Fund will be issued in dematerialised (or uncertificated) form and that the Fund will apply for admission for clearing and settlement through a Securities Settlement System. Shares will therefore be issued in registered form and only persons appearing on the register of Shareholders will be a Shareholder. Ownership of Shares will be confirmed by written confirmation of entry on the register of shareholders.
Base Currency	US Dollars.
Portfolio Currency	Japanese Yen
Business Day	A day on which commercial banks are generally open for business in London.
Creation Unit	150,000 Shares, unless determined otherwise by the Manager.
Dealing Day	Each Business Day (excluding any day on which the Tokyo Stock Exchange is closed). A list of the Fund’s Dealing Days is available from the Administrator.
Dealing Deadline	4.30 p.m. (Irish time) on the Business Day prior to the relevant Dealing Day.
Publication Time	8.00 a.m. (Irish time) on each Dealing Day.
Valuation Point	6.00 p.m. (Irish time) on each Dealing Day.
Dividend Policy	Semi-annual dividends will normally be declared in June and December. Share classes with an accumulating policy shall not distribute dividends to Shareholders. Income and other profits will be accumulated and reinvested on behalf of Shareholders.

Subscriptions during the initial offer period

The time during which Shares of the Fund (other than the WisdomTree Japan Equity UCITS ETF – USD Hedged, WisdomTree Japan Equity UCITS ETF – CHF Hedged Acc, WisdomTree Japan Equity UCITS ETF – EUR Hedged Acc, WisdomTree Japan Equity UCITS ETF – GBP Hedged and WisdomTree Japan Equity UCITS ETF – JPY Acc, (which Share class has seeded)) will initially be on offer is the period beginning at 9:00 a.m. (Irish time) on 13 October 2016 and ending on the earlier of the receipt of an initial subscription or 5:00 p.m. (Irish time) on 12 April 2017 (or such other date as may be determined by the Directors and notified to the Central Bank). Subscription Order Forms for Creation Units must be received during the initial offer period.

Shares will be initially offered at a price of US\$16.00 per Share in a Creation Unit (together with the applicable Cash Component, Duties and Charges and Cash Transaction Charge (if relevant)). However, the actual initial price per Share may vary from this estimated price depending on movements in the value of the securities which comprise the Index between the date of this Supplement and the date that the initial offer period closes.

Settlement of orders for Creation Units during the initial offer period must be received by the second Business Day after the end of the initial offer period.

Subscriptions following the initial offer period

Creation Units may be subscribed for on a Dealing Day at a price based on the Net Asset Value per Share multiplied by the number of Shares in a Creation Unit. Applicants for Shares must also remit the amount of cash and charges as set out in the Portfolio Composition File and pay Duties and Charges, if applicable.

The Manager, at its discretion, may charge a Subscription Fee of up to 3% of the aggregate Net Asset Value per Share in the Creation Unit subscribed for.

Settlement of Subscriptions following the initial offer period

Settlement of subscriptions must be received by the Administrator:

- (a) in respect of cash subscriptions, by 2 p.m. (Irish time) on the third Business Day after the relevant Dealing Day, provided that if such day is not a day on which foreign exchange markets are open for settlement of payments in the relevant Share Class Currency (a “**Currency Day**”), settlement will be postponed to the immediately following Currency Day;
- (b) in respect of in-kind subscriptions, by 3 p.m. (Irish time) on the third Business Day after the relevant Dealing Day or within such other period as the Directors may determine (not exceeding 10 Business Days following the relevant Dealing Deadline). In-kind subscriptions can only be made in the shares classes with a Share Class Currency denominated in US Dollar.

Redemptions

Creation Units may be redeemed on a Dealing Day at a price based on the Net Asset Value per Share multiplied by the number of Shares in a Creation Unit. A redeeming Shareholder will have deducted from redemption proceeds an appropriate amount of Duties and Charges, if applicable.

The Shares which are the subject of the redemption must be received by the Fund by 2 p.m. (Irish time) on the third Business

Day after the relevant Dealing Day.

The Manager, at its discretion, may charge a Redemption Fee of up to 3% of the aggregate Net Asset Value per Share in the Creation Unit redeemed.

Settlement of redemptions

Redemption proceeds will be typically transferred within three Business Days of the relevant Dealing Day and, in any event, within such other period as the Directors may determine (not exceeding 10 Business Days following the relevant Dealing Deadline), provided that all required documentation has been furnished to the Administrator and the relevant Shareholder has delivered, in the relevant Securities Settlement System, the Shares to be redeemed.

Valuation methodology

Investments of the Fund which are listed or traded on one Regulated Market for which quotations are readily available shall be valued at the last traded price on such Regulated Market for such Investment. Where Investments are quoted, listed or normally dealt in on more than one Regulated Market, the market which in the opinion of the Administrator, constitutes the main market for the relevant Investment or which provides the fairest criteria for valuing the relevant Investment shall be used. A particular or specific asset may be valued using an alternative method of valuation if the Directors deem it necessary and the alternative method has been approved by the Depository.

Compulsory redemption threshold

US\$15 million.

5. FEES

The Fund shall pay the following fees and expenses out of its assets:

- A. a TER (as set out in the table above);
- B. brokerage or other expenses of acquiring and disposing of Investments, as set out in further detail in the Prospectus; and
- C. extraordinary expenses (i.e. those unforeseen expenses falling outside of the general expenses payable by the Manager out of its fees, such as expenses related to any litigation, exercise of voting rights and corporate actions).

Investors are referred to the section of the Prospectus entitled "Operational costs and expenses".

Fees and expenses relating to establishment of the Fund will be borne by the Manager.

6. DISCLAIMERS

Indices

Neither the Company, the Manager, the Investment Manager, WisdomTree nor their affiliates guarantee the accuracy or the completeness of the Indices or any data included therein and shall have no liability for any errors, omissions or interruptions therein. Such parties make no warranty, express or implied, to the owners of Shares of the Fund or to any other person or entity, as to results to be obtained by the Fund from the use of the Index or any data included therein. Without limiting any of the foregoing, in no event shall such parties have any liability for any special, punitive, direct, indirect or consequential damages (including lost profits), even if notified of the possibility of such damages.

Index Provider Website

The Company is required to provide details of WisdomTree's website to enable Shareholders to obtain further details of the Index (including its constituents). Neither the Company, the Manager nor the Investment Manager has any responsibility for the contents of such website and are not involved in any way in sponsoring, endorsing or otherwise involved in the establishment, maintenance or contents of the website.
