

ETFS Long CAD Short USD LCAD

Investment Objective

ETFS Long CAD Short USD (LCAD) is designed to provide investors with exposure to Canadian Dollar ("CAD") relative to US Dollars ("USD") by tracking the MSFX Long Canadian Dollar Index (TR) (the "Index"), which aims to reflect the performance of a position in forward contracts which are rolled on a daily basis.

LCAD is an exchange traded currency ("ETC"). Its securities can be created and redeemed on demand by authorised participants and traded on exchange just like shares in a company. The ETC obtains exposure to the Index by entering into unfunded swaps with a counterparty. There is no upfront cash payment by the Issuer to the counterparty when an unfunded swap is created.

However, daily cash payments are made between the Issuer and the counterparty to reflect the daily movements in the value of the Index. Separately, the Issuer uses the cash it holds to purchase eligible collateral from the counterparty under a daily reverse repurchase agreement ("reverse repo"), an agreement whereby the counterparty agrees to repurchase such eligible collateral from the Issuer the following day. The eligible collateral is held by the custodian in a custody account.

About The Index

The Index provides: (i) a 'long' exposure to CAD relative to USD. For example, if CAD were to rise in value relative to USD, the Index (tracked by the ETC) would rise in value. Conversely if CAD were to decrease in value relative to USD, the Index would also decrease in value; and (ii) an interest rate differential reflecting the difference between the CAD and the USD exchange rates.

The Index is a total return index, which means that it also provides a collateral yield.

Product Information	
Product Name	ETFS Long CAD Short USD
Issuer	ETFS Foreign Exchange Limited
Legal Form	Debt security
UCITS Eligible	Yes
Domicile	Jersey
Listing Date	12 November 2009
Base Currency	USD
Management Fee	0.39% p.a.
Replication	Synthetic - unfunded swap backed by collateral
Collateralised	Yes
Counterparties	Morgan Stanley & Co. International plc
Trustee	The Law Debenture Trust Corporation p.l.c.
SIPP And ISA (UK) Eligible	Yes
UK Reporting Fund Status	Yes
Registered in	Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Netherlands, Norway, Spain, Sweden, United Kingdom

Index Information	
Index Name	MSFX SM Long Canadian Dollar Index (TR)
Index Provider	MSFX
Base Currency	USD

Spot CADUSD	0.6%	1.6%	-3.2%	-10.0%	-19.4%

Risks

General investment risk: An investment in an ETC involves a significant degree of risk. Any decision to invest should be based on the information contained in the relevant prospectus. Prospective investors should obtain independent accounting, tax and legal advice and should consult their professional advisers to ascertain the suitability of this ETC as an investment to their own circumstances. The value of securities in this ETC is directly affected by increases and decreases in the value of the Index. Accordingly, the value of a security may go up or down and a security holder may lose some or all of the amount invested.

Currency exchange rate risks: Currency exchange rates can be extremely volatile and such volatility may adversely impact the returns on an investment in the ETC.

Liquidity risk: There can be no certainty that securities can always be bought or sold on a stock exchange or that the market price at which the securities may be traded on a stock exchange will always accurately reflect the performance of the Index.

Counterparty risk: The Issuer is reliant on there being counterparties available to enter into swap agreements with on a continuing basis and, if no counterparties are willing to do so, the ETC will not be able to achieve its investment policy of tracking the performance of the Index.

Credit risk: The Issuer is subject to the risk that third party service providers may fail to return property belonging to the Issuer or pay money due to the Issuer.

Benchmark Considerations

Data in this chart is simulated and should not be interpreted as an indication of actual or future performance.

The benchmark information shown here is denominated in the base currency and does not reflect 1) the effect of fees and expenses and 2) any movements in the exchange rate between the base currency and any other currency that may be used by an investor. Exchange rate risk should always be considered when analysing performance denominated in another currency. Past performance is not a reliable indicator of future results.

Glossary

Authorised participant	Banks or other financial institutions that act as intermediaries between issuers of securities and other investors or intermediaries. Authorised participants subscribe for and redeem securities directly with the Issuer and buy and sell those securities to investors/intermediaries either directly or via stock exchanges.
Eligible Collateral	Cash from creations is used by the Issuer to purchase securities that meet certain eligibility criteria from the counterparty under a reverse repo. Such eligible collateral is held by the Issuer in an account in its name with the custodian.
Collateral yield	The collateral yield is the hypothetical interest that an investor would have received on cash equal in value to the underlying futures contracts.
Counterparty	A Counterparty is a bank or financial institution with whom the Issuer enters into swaps or other similar transactions.
Forward Contract	A currency forward contract is an agreement to purchase an amount of one currency with another currency at a certain date in the future ("maturity"). At maturity, a new currency forward contract is purchased with the cash proceeds from the last contract (a process known as 'rolling') so that continuous exposure to the exchange rate is maintained.
Swap or swap agreement	This is where the Issuer enters into contracts with one or more swap counterparties whereby the Issuer receives payments from a swap counterparty when the Index (tracked by the relevant ETC) goes up and the Issuer makes payments to the swap counterparty when the Index goes down. By using swaps, the ETC can efficiently track the upward or downward performance of the Index without having to actually own the underlying constituent(s) which make up the Index.
Unfunded swap	This is a swap whereby the cash from investors is not transferred by the Issuer to the swap counterparties but is retained by the Issuer for use as collateral.

IMPORTANT INFORMATION

Communications issued in the European Economic Area ("EEA"): This document has been issued and approved by WisdomTree Ireland Limited, which is authorised and regulated by the Central Bank of Ireland.

Communications issued in jurisdictions outside of the EEA: This document has been issued and approved by WisdomTree UK Limited, which is authorised and regulated by the United Kingdom Financial Conduct Authority.

WisdomTree Ireland Limited and WisdomTree UK Limited are each referred to as "WisdomTree" (as applicable). Our Conflicts of Interest Policy and Inventory are available on request.

For professional clients only. Past performance is not a reliable indicator of future performance. Any historical performance included in this document may be based on back testing. Back testing is the process of evaluating an investment strategy by applying it to historical data to simulate what the performance of such strategy would have been. Back tested performance is purely hypothetical and is provided in this document solely for informational purposes. Back tested data does not represent actual performance and should not be interpreted as an indication of actual or future performance. The value of any investment may be affected by exchange rate movements. Any decision to invest should be based on the information contained in the appropriate prospectus and after seeking independent investment, tax and legal advice. These products may not be available in your market or suitable for you. The content of this document does not constitute investment advice nor an offer for sale nor a solicitation of an offer to buy any product or make any investment.

An investment in exchange-traded products ("ETPs") is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs involve numerous risks including among others, general market risks relating to the relevant underlying index, credit risks on the provider of index swaps utilised in the ETP, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks.

The information contained in this document is not, and under no circumstances is to be construed as, an advertisement or any other step in furtherance of a public offering of shares in the United States or any province or territory thereof, where none of the issuers or their products are authorised or registered for distribution and where no prospectus of any of the issuers has been filed with any securities commission or regulatory authority. No document or information in this document should be taken, transmitted or distributed (directly or indirectly) into the United States. None of the issuers, nor any securities issued by them, have been or will be registered under the United States Securities Act of 1933 or the Investment Company Act of 1940 or qualified under any applicable state securities statutes.

This document may contain forward looking statements including statements regarding our belief or current expectations with regards to the performance of certain assets classes and/or sectors. Forward looking statements are subject to certain risks, uncertainties and assumptions. There can be no assurance that such statements will be accurate and actual results could differ materially from those anticipated in such statements. WisdomTree strongly recommends that you do not place undue reliance on these forward-looking statements.

Short and leveraged exchange-traded products are only intended for investors who understand the risks involved in investing in a product with short and/or leveraged exposure and who intend to invest on a short term basis. Any investment in short and/or leveraged products should be monitored on a daily basis to ensure consistency with your investment strategy. You should understand that investments in short and/or leveraged exchange-traded products held for a period of longer than one day may not provide returns equivalent to the return from the relevant unleveraged investment multiplied by the relevant leverage factor. Potential losses in short and/or leveraged exchange-traded products may be magnified in comparison to investments that do not incorporate these strategies. Please refer to the section entitled "Risk Factors" in the relevant prospectus for further details of these and other risks associated with an investment in short and/or leveraged exchange-traded products. You should consult an independent investment adviser prior to making an investment in short and/or leveraged exchange-traded products in order to determine its suitability to your circumstances.

The products discussed in this document are issued by ETFS Foreign Exchange Limited (the "Issuer"). The Issuer is regulated by the Jersey Financial Services Commission. Investors should read the prospectus of the Issuer before investing and should refer to the section of the prospectus entitled "Risk Factors" for further details of risks associated with an investment in the securities offered by the Issuer.

Securities issued by the Issuer are direct, limited recourse obligations of the Issuer alone and are not obligations of or guaranteed by any of Morgan Stanley & Co International plc, Morgan Stanley & Co. Incorporated, any of their affiliates or anyone else or any of their affiliates. Each of Morgan Stanley & Co International plc and Morgan Stanley & Co. Incorporated disclaims all and any liability whether arising in tort, contract or otherwise (save as referred to above) which it might have in respect of this document or its contents otherwise arising in connection herewith.

The Morgan Stanley Indices are the exclusive property of Morgan Stanley & Co. Incorporated ("Morgan Stanley"). Morgan Stanley and the Morgan Stanley index names are service mark(s) of Morgan Stanley or its affiliates and have been licensed for use for certain purposes by ETFS Management Company (Jersey) Limited in respect of the securities issued by Issuer. The securities issued by Issuer are not sponsored, endorsed, or promoted by Morgan Stanley, and Morgan Stanley bears no liability with respect to any such financial securities. The prospectus of Issuer contains a more detailed description of the limited relationship Morgan Stanley has with Issuer and any related financial securities. No purchaser, seller or holder of securities issued by Issuer, or any other person or entity, should use or refer to any Morgan Stanley trade name, trademark or service mark to sponsor, endorse, market or promote this product without first contacting Morgan Stanley to determine

whether Morgan Stanley's permission is required. Under no circumstances may any person or entity claim any affiliation with Morgan Stanley without the prior written permission of Morgan Stanley.
