

ETFS 3x Daily Short DAX 30 GE3S

Investment Objective

ETFS 3x Daily Short DAX 30 (GE3S) is designed to enable investors to gain a three times daily leveraged 'short' exposure to DAX[®] (TR) (DAX 30) by tracking the ShortDAX[®] x3 AR (TR) (the "Index"). A three times daily leveraged short exposure means that the product is designed to reflect minus three times the daily percentage change in the DAX 30. For example, if the DAX 30 was to rise in value by 5% on a particular day, the product would decrease in value by 15% on that day (before fees, expenses and adjustments). GE3S is an exchange traded product ("ETP"). It is not a UCITS. Securities in this ETP are structured as debt securities and not as shares (equity) and can be created and redeemed on demand by authorised participants and are traded on exchange just like shares in a company. The ETP is backed by swaps. The payment obligations of the swap counterparty to the Issuer are protected by collateral held in a segregated account at The Bank of New York Mellon. Details of the collateral held can be found in the Collateral section of the ETF Securities website (www.etfsecurities.com).

Index Description

The Index is a total return index which is designed to provide a three times daily leveraged short exposure to DAX[®] (TR) (DAX 30). Each trading day returns, before fees, expenses and adjustments, will be positive when the DAX 30 falls relative to the previous day's close, and negative when the DAX 30 rises relative to the previous day's close. In the event of a large rise in the value of DAX 30 during the course of a trading day it is possible that an intra-day reset may be triggered with respect to the Index in order to restrict the loss in value of the Index as more particularly described in the prospectus.

Short ETPs are only intended for investors who understand the risks involved in investing in an ETP with leveraged short exposure and who intend to invest on a short-term basis. **Any investment in a short ETP should be monitored on a daily basis to ensure consistency with your investment strategy. Please refer to the section entitled "Risk Factors" in the prospectus for further details of these and other risks associated with an investment in short ETPs.** You should consult an independent investment adviser prior to making an investment in a short ETP in order to determine its suitability to your circumstances.

Product Information

Product Name	ETFS 3x Daily Short DAX 30
Legal Form	Debt security
Issuer	ETFS Equity Securities Limited
UCITS Eligible	Yes
Domicile	Jersey
Listing Date	27 May 2014

Specific Risks of Daily Short ETPs

An investment in a Daily Short ETP involves a significant degree of risk. Any decision to invest should be based on the information contained in the relevant prospectus. Prospective investors should obtain independent accounting, tax and legal advice and should consult their professional advisers to ascertain the suitability of this ETP as an investment to their own circumstances.

You should understand that investments in Daily Short ETPs held for a period of longer than one day may not provide returns equivalent to the return from the relevant benchmark multiplied by the relevant leverage factor and the return may differ significantly.

The price of a Daily Short ETP will fall when the underlying benchmark rises. If the value of the relevant benchmark rises for extended periods, a Daily Short ETP will likely lose most or all of its value. If the underlying benchmark rises by 33% or more in one day then it is possible (in the absence of an intra-day reset) that an investment in a Daily Short ETP will lose all of its value.

The price of securities in this ETP is generally quoted in Euros. To the extent that a security holder purchases securities in another currency, the value will be affected by changes in the exchange rate.

Daily Short ETPs are only intended for investors who understand the risks involved in investing in an ETP with leveraged short exposure and who intend to invest on a short term basis. Any investment in a Daily Short ETP should be monitored on a daily basis to ensure consistency with your investment strategy.

There can be no certainty that securities can always be bought or sold on a stock exchange or that the market price at which the securities may be traded on a stock exchange will always accurately reflect the performance of the Index.

The Issuer is reliant on there being a swap counterparty available to enter into swap agreements with it on a continuing basis and, if no swap counterparty is willing to do so, the ETP will not be able to achieve its investment policy of tracking the performance of the Index.

The Issuer is subject to the risk that the swap counterparty and other third party service providers may fail to return property belonging to the Issuer or pay money due to the Issuer.

Benchmark Considerations

The Index provides a three times daily leveraged short exposure to the underlying benchmark. The Index does not take into account any fees, expenses, or adjustments which will be charge to an investor holding the daily short ETP. Fees, expenses, and adjustments are incorporated within the return of the Daily Short ETP which tracks the Index.

The Underlying benchmark is a total return index and so provides a leveraged short exposure to (i) the capital gain or loss of each equity comprised within the underlying benchmark and (ii) any cash distributions payable with respect to those equities, such as dividends, which will be treated as reinvested back into the underlying benchmark. Total return indices can be sub-categorised as gross total return indices or net total return indices. Gross total return indices will typically be treated as having re-invested into the benchmark the total dividend amount, whereas net total return indices typically deduct an amount on account of withholding tax before re-investing the dividend amount into the benchmark.

The information shown here is priced in Euros and does not reflect any movements in the exchange rate between Euros and any other currency.

Glossary

Authorised participant	Banks or other financial institutions that act as intermediaries between issuers of securities and other investors or intermediaries. Authorised participants subscribe for and redeem securities directly with the Issuer and buy and sell those securities to investors/intermediaries either directly or via stock exchanges.
Collateral held	Cash or other transferable securities which are held independently to reduce the Issuer's credit risk in respect of any single counterparty. For example, if the Index (tracked by the ETP) increases, the amount owed to the Issuer by the swap counterparty increases and therefore additional collateral is transferred by the swap counterparty to reduce the increased risk to the ETP of that counterparty.
Exposure	An ETP has exposure to an index or commodity if its value is directly affected by movements in the price of that index. Exposure to an index can be achieved in various different ways. This ETP aims to provide exposure to the Index using Equity Contracts (swaps).
Fully funded swap	This is a swap whereby the cash from investors is transferred by the Issuer to the swap counterparty.
Swap or swap agreement	This is where the Issuer enters into contracts with one or more swap counterparties whereby the Issuer receives payments from a swap counterparty when the Index (tracked by the relevant ETP) goes up and the Issuer makes payments to the swap counterparty when the Index goes down. By using swaps, the ETP can efficiently track the upward or downward performance of the Index without having to actually own the underlying constituent(s) which make up the Index.
Swap counterparty	Typically a large bank or financial institution with whom the Issuer enters into swaps.
Marked to market	The amount of collateral held will be adjusted on a daily basis in order to reflect the value of the swaps.

Back testing is the process of evaluating an investment strategy by applying it to historical data to simulate what the performance of such strategy would have been. Back tested performance is purely hypothetical and is provided in this document solely for informational purposes. Back tested data does not represent actual performance and should not be interpreted as an indication of actual or future performance. The value of any investment may be affected by exchange rate movements. Any decision to invest should be based on the information contained in the appropriate prospectus and after seeking independent investment, tax and legal advice. These products may not be available in your market or suitable for you. The content of this document does not constitute investment advice nor an offer for sale nor a solicitation of an offer to buy any product or make any investment.

An investment in exchange-traded products ("ETPs") is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs involve numerous risks including among others, general market risks relating to the relevant underlying index, credit risks on the provider of index swaps utilised in the ETP, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks.

The information contained in this document is not, and under no circumstances is to be construed as, an advertisement or any other step in furtherance of a public offering of shares in the United States or any province or territory thereof, where none of the issuers or their products are authorised or registered for distribution and where no prospectus of any of the issuers has been filed with any securities commission or regulatory authority. No document or information in this document should be taken, transmitted or distributed (directly or indirectly) into the United States. None of the issuers, nor any securities issued by them, have been or will be registered under the United States Securities Act of 1933 or the Investment Company Act of 1940 or qualified under any applicable state securities statutes.

Short and leveraged exchange-traded products are only intended for investors who understand the risks involved in investing in a product with short and/or leveraged exposure and who intend to invest on a short term basis. Any investment in short and/or leveraged products should be monitored on a daily basis to ensure consistency with your investment strategy. You should understand that investments in short and/or leveraged exchange-traded products held for a period of longer than one day may not provide returns equivalent to the return from the relevant unleveraged investment multiplied by the relevant leverage factor. Potential losses in short and/or leveraged exchange-traded products may be magnified in comparison to investments that do not incorporate these strategies. Please refer to the section entitled "Risk Factors" in the relevant prospectus for further details of these and other risks associated with an investment in short and/or leveraged exchange-traded products. You should consult an independent investment adviser prior to making an investment in short and/or leveraged exchange-traded products in order to determine its suitability to your circumstances.

The products discussed in this document are issued by ETFS Equity Securities Limited (the "Issuer"). The Issuer is regulated by the Jersey Financial Services Commission. Investors should read the prospectus of the Issuer before investing and should refer to the section of the prospectus entitled 'Risk Factors' for further details of risks associated with an investment in the securities offered by the Issuer.

The Issuer is neither sponsored nor promoted, distributed or in any other manner supported by Deutsche Börse AG (the "Licensor"). The Licensor does not give any explicit or implicit warranty or representation, neither regarding the results deriving from the use of ShortDAX[®] x3 AR (TR) (the "Index") and/or the Index trademark nor regarding the Index value at a certain point in time or on a certain date nor in any other respect. The Index is calculated and published by the Licensor. Nevertheless, as far as admissible under statutory law the Licensor will not be liable vis-à-vis third parties for potential errors in the Index. Moreover, there is no obligation for the Licensor vis-à-vis third parties, including investors, to point out potential errors in the Index.

Neither the publication of the Index by the Licensor nor the granting of a license regarding the Index as well as the Index trademark for the utilization in connection with the financial instrument or other securities or financial products, which derived from the Index, represents a recommendation by the Licensor for a capital investment or contains in any manner a warranty or opinion by the Licensor with respect to the attractiveness on an investment in this product.

In its capacity as sole owner of all rights to the Index and the Index trademark the Licensor has solely licensed to the Issuer of the financial instrument the utilization of the Index and the Index trademark as well as any reference to the Index and the Index trademark in connection with the financial instrument. ShortDAX[®]

is a registered trademark of Deutsche Börse AG.

Securities issued by the Issuer are direct, limited recourse obligations of the Issuer alone and are not obligations of or guaranteed by Société Générale ("SG") or any of its affiliates.

SG has no obligation or liability other than to perform its obligations owing to the Issuer as contemplated by the agreements between such parties. As such, SG has no duty of care nor any liability whatsoever (whether in contract, tort or otherwise) to any other person (including the security holders).

SG disclaims all and any liability whether arising in tort, contract or otherwise in respect of this document and its contents.
